3D WORLDWIDE PRODUCTIONS

3DWP RENTS 3D CAMERAS AND RIGS

3DWP rents specialised stereoscopic (3D) image capture equipment for the motion picture entertainment industry.

We can provide the solution to all 3D image capture and broadcast requirements by drawing on the resources of the 3D Camera Company www.3dcameracompany.com.

The 3D Camera Company is at the forefront of developing 3D image capture technologies and our low overheads allow us to apply these to your project at best rates.

We can also provide live 3D broadcast, or live 3D to tape capabilities with single or multiple camera systems for cable, satellite, cinema and closed circuit.

3DWP offers the services of international award-winning Stereographers, Camera Operators, Assistant Camera Persons and Data Information Technologists as needed.

Our offices are in Toronto, London, Budapest and now in Australia through an arrangement with Millmaine Entertainment.

CAMERAS, RIGS & PROCESSING

Cameras and rigs are available for all situations - feature film, IMAX format, underwater, sports, live concerts, macro applications, television and documentary.

The rigs can accommodate any camera: Red, Alexa, Sony P1 or the SI (Silicon Imaging) 2K Mini camera.

Also available is the 3D-SI Hawkeye system developed by the 3D Camera Company in conjunction with Silicon Imaging. The Hawkeye is a portable camera that contains two fixed-lens 2K Mini cameras within one body with the highest quality optics available.

The SI-3D Broadcast System can capture and record RAW uncompressed 2K Data (2048 x 1152 pixels) and in Real Time converts the RAW Data to HD-SDI Left and Right eye signals for Live Data Switching and Up-Link to Satellite for Global Distribution. This 3D System provides an extremely compact, lightweight and versatile solution for sports, music and broadcast applications.

3D Digital-Cinema (DCI compliant), IMAX and broadcast formats are supported.

As well as standard side by side rigs, a choice of mirror rigs/beam splitters is offered for any shooting situation and camera: Element Technica, P&S Technic and Stereo Tango are available in a variety of sizes. We are also able to outfit specialized production situations with steadicams, helmetcams, bodycams and underwaterncams.

See the following pages for samples of range of cameras, equipment and applications.

THE 3D MARKET

There has been a huge growth of 3D cinemas throughout the world resulting from the International Digital Cinema Standard establishment in 2007.

PDT Pacific Media Associates are predicting that 5.4 million 3D-capable front projectors will ship in 2014 - roughly five times the number shipped in 2010.

Bell, Discovery, ESPN and SKY launched 3D TV Channels in 2010.

Over 82 sporting events will be televised in 3D in 2010-11. The 2011 Wimbledon finals were broadcast in 3D.

Vizio, Sony and Samsung released 3D TV's for Home Entertainment in 2010. An Insight Media report of 2010 suggests there will be 3.3 million units sold by 2011 and 50 million by 2015.
